Education

Mercubuana University Jakarta, Indonesia
Information Systems, Business Intelligence. GPA :3.59/4.00 Fresh Graduate
Thesis : Segmentation Of Daily Nutrition Intake Patterns In Mercubuana University Students Using The K-Means Algorithm.
Relevant Coursework: Programming PL/SQL, Process Mining, Data Warehouse & Big Data, Data Analytics Programming, Data Visualization, Statistics and Probability

Experience

Lembaga Sertifikasi Profesi (LSP) Universitas Mercubuana Jakarta, Indonesia
Staff Internship Dec 2025 – Nov 2026

- **Managed and validated** institutional assessment documents (MUK) for competency certification processes, ensuring completeness and full compliance with national standards.
- **Administered and maintained** structured database tracking system for certification data and institutional staff resource requirements to optimize administrative workflows.
- **Extracted, Processed, and Analyzed** administrative data to support staff decision-making processes and ensure efficient operational resource allocation.
- **Guided and Assisted** students throughout the registration, document submission, and onboarding processes for competency assessments, enhancing user experience.
- **Organized and facilitated** institutional events as an organizing committee member, including the Competency Assessor Training, Mercu Buana Competency Network, and competency assessment sessions.

Sariling Aneka Energi Tangerang, Indonesia
Data Quality Internship May 2025 – Aug 2025

- **Executed and monitored** automated Python web scraping scripts to extract bulk product catalog data from provider platforms systematically.
- **Performed data cleansing and preprocessing** to identify anomalies, eliminate duplicates, and standardize product information for production databases.
- **Managed the automated data upload** workflow, ensuring seamless data ingestion and maintaining the integrity and quality of high-volume catalog records.

Bitlabs Academy (Kampus Merdeka MSIB) Tangerang, Indonesia
Data Analytics For Business (Apprenticeship) Sep 2024 – Dec 2024

- **Gained hands on experience in data analyst**, visualization and turning business data into actionable insights.
- **Worked on a capstone project** to analyze sales performance and profitability, identifying factors contributing to revenue growth
- **Analyzed business** datasets to uncover trends, optimize operations, and provide actionable insights for decision-making.
- **Delivered presentations on key findings and recommendations**, improving data-driven decision-making across departments.

Leadership & Organizations

Himpunan Mahasiswa Sistem Informasi (HIMSISFO) Jakarta, Indonesia
Staff of Business Development Division Oct 2024 – Sep 2025

- **Secured financial sponsorships and partnership deals** with external parties to fund and support various departmental events and programs.
- **Initiated and managed entrepreneurial fundraising projects** (*dana usaha*) to generate additional internal revenue for organization operational needs.
- **Monitored and recorded cash flows**, overseeing both incoming revenue and outgoing expenditures to ensure financial accountability and budget compliance.

Project Experience

Klasifikasi Prediktif Tingkat Stres & Kesehatan Mental Mahasiswa Jakarta, Indonesia
Uji Kompetensi BNSP Business Intelligence Jan 2026

- Conducted comprehensive exploratory data analysis (EDA) and data preprocessing on 2 educational datasets using Pandas and NumPy, engineering custom behavioral metrics including a Psychosocial Burden Index and study-to-screen ratios.
- Engineered and trained a multi-class **Random Forest Classifier** via Scikit-learn to predict student stress tiers, achieving **89% overall accuracy** and balanced F1-scores between **88%–91%** across all classes.
- Analyzed model feature importance and extracted key behavioral drivers, identifying physiological indicators and sleep quality as top contributors to student stress to inform institutional wellness strategies.
- Designed analytical visualizations and correlation heatmaps utilizing Matplotlib and Seaborn to communicate complex lifestyle and academic performance correlations for stakeholder decision-making.

Nutrition Intake Pattern Segmentation Analysis Jakarta, Indonesia
Undergraduate Thesis Project Mar 2026 – Jul 2026

- **Built and deployed an internal application** to streamline questionnaire data ingestion, data collection, and centralized storage processes for daily student nutritional monitoring.
- **Managed data pipelines** by exporting raw data into structured Excel formats and executing data cleansing to handle anomalies based on **Knowledge Discovery in Databases (KDD)** methodologies.
- **Implemented K-Means clustering algorithm** using Python to segment student data into distinct daily nutritional intake profiles, providing data-driven insights into university student consumption patterns.

Paper Id Capstone Project MSIB Tangerang, Indonesia
Fraud Data Analyst Dec 2024

- **Designed Business Process Models (BPMN)** to map the workflow of data processing and fraud detection, providing a clear overview of the entire process from data collection to fraud identification.
- **Conducted data cleansing and Exploratory Data Analysis (EDA)** using statistical methods to handle anomalies, remove duplicates, and uncover hidden patterns or correlations.
- **Engineered advanced features and metrics**, including Paper.id usage frequency and time-based patterns, through Python-driven cohort and social network analysis to detect collaborative fraud.
- **Built interactive Tableau dashboards** to visualize key fraud trends and findings, transforming complex datasets into actionable insights for stakeholder decision-making.

Superstore Dashboard Mid Term Project MSIB Tangerang, Indonesia
Data Analyst Nov 2024

- **Cleaned and transformed** raw superstore datasets using **Python** to handle missing values and formatting, ensuring high data integrity for analysis.
- **Built an interactive dashboard** using Power BI to monitor real-time Key Performance Indicators (KPIs), including total sales, profit margins, and monthly product trends.
- **Conducted descriptive statistical analysis** to uncover sales patterns, providing stakeholders with actionable insights for product strategy and inventory planning

Skills & Interests

Technical: Python, SQL, Excel, Tableau, Power BI, R, MongoDB, Javascript, Laravel & PHP
Language: Indonesia (Native) & English (Conversational)
Methodologies: Exploratory Data Analysis (EDA), K-Means Clustering & Process Mining
Interests: Data Science & AI Engineer
